TECHNICAL SKILLS

Languages: Python(Advanced), C++(Intermediate), JavaScript(Basic)

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA)

Frontend: React.js, Next.js, Tailwind CSS, Figma

Backend: Node.js, Express.js, Mongoose, JWT, Flask, Django

Databases: MongoDB, MySQL

Testing Tools: Mocha, Chai, Supertest, Selenium, k6, In-Memory MongoDB (MongoDB Memory Server), API Testing

Tools & Platforms: Render, Netlify, Vercel, Postman, Bruno

Version Control & OS: Git, GitHub, Windows, macOS

API Technologies: REST APIs, FastAPI

PERSONAL STATEMENT

I am a Software Product Engineering student with a strong foundation in full-stack development and a growing interest in data science. I have experience building scalable web applications and analyzing data to extract meaningful insights. Skilled in Python, data analysis, and modern web technologies, I aim to leverage both development and analytical skills to solve real-world problems. I have a proven track record in software testing and quality assurance, ensuring the delivery of robust and reliable digital solutions. I am seeking an internship where I can contribute to data-driven and product-focused solutions.

PROJECTS

IPL Data Analysis Project | [Github Repo Link](#)

March-2026

Built a data analysis project to explore IPL datasets and uncover trends in team performance, player statistics, and match outcomes.

- **Tech Stack and Tools used:** Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook
- **Performed** data cleaning, preprocessing, and exploratory data analysis (EDA) to extract meaningful insights.
- **Learning Outcome:** Developed the ability to visualize data effectively and interpret patterns from real-world datasets

ShopZee | [Github Repo Link](#)

March-2025

Built a simplified product display web application with a clean, modern UI and integrated shopping cart functionality.

- **Tech Stack and Frameworks used:** React.js, Next.js, Tailwind CSS, Node.js, Express.js, QuaggaJS; used React Context API for state management and integrated backend APIs.
- **Problem Solved:** Provides a simplified e-commerce platform to showcase products with details and cart functionality; useful for small retailers or demo stores.
- **Impact:** Peer-tested project demonstrating smooth UI, barcode scanning, and shopping cart features; received positive feedback for real-world retail simulation.
- **Learning Outcome:** Faced debugging challenges while integrating API data and global state management; learned barcode scanning integration and improving responsive design.

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering)

2023-27

Campus: KARE Srivilliputhur | Bachelor's enrollment: B.Tech, Kalasalingam University

ACHIEVEMENTS & EXTRACURRICULARS

- **Kalvium Forge Program:** Completed a 2-week research internship at KalviumLabs, gaining hands-on industry experience and earning a [Research Intern certification](#).
- **CourseLeet Pilot Program:** Selected as 1 of 5 students to refine and audit curriculum content; awarded a [Teaching/Research Assistant Certificate](#).
- **Pitch-a-thon Runner-Up:** Secured **2nd Prize** for proposing a scalable solution to improve primary education in underprivileged regions.
- **Coding Blocks Club:** Technical Team Member responsible for organizing hackathons, conducting technical workshops, and mentoring peers.
